Informatics Engineer “Front-End Developer”

I am skilled Informatics Engineer with a strong background in Front-end web & mobile development using the React.js library & Flutter framework. Proficient in C# and Python, I have over four years of experience in IT support, successfully resolving diverse technical challenges. My proficiency in enhancing digital experiences and driving technological innovation distinguishes me in the field.

Experience

APRIL 2022 – PRESENT

Information Technology Engineer | Melkite Greek Catholic Patriarchate Damas Eparchie | Damascus, SYR

As an information technology Engineer, I manage the Patriarchate's ERP system and database, and provide IT support to employees and Fathers across 15 churches. My responsibilities include ensuring the system's smooth operation, managing user permissions, performing regular backups, and offering technical support for various devices and software.

- ERP System and Database Management • ERP System Installation and Maintenance • IT Technical Support

JULY 2023 – AUGUST 2023

Junior Front-End Developer Intern | Francis-Tech | Remote

I completed an intensive internship in Front-End Web Development, specializing in HTML, CSS, and JavaScript. Throughout the program, I focused on mastering the essentials of building visually appealing and user-friendly websites and applications. With a solid foundation in HTML, CSS, and JavaScript, I'm equipped with the skills and passion to create dynamic digital experiences.

JAN 2023 – PRESENT

Digital Marketing Officer | Francis-Tech | Remote

As a Digital Marketing Officer, I was instrumental in driving awareness of the company's offerings through various digital channels. My key responsibilities included:

- 1 social media content creation
- 2 Design & promotion of posters and ads
- 3 Interacting with customers & answering inquiries
- 4 Planning & implementing marketing campaigns on social media
- 5 Managing the company's platforms on Facebook, LinkedIn

DEC 2019 – PRESENT

IT Support Engineer | Freelance

As an IT Support Engineer, I delivered the following services to organizations, institutions, and individuals:

1. Operating System Installation and Hardware Configuration
2. Troubleshooting and Issue Resolution
3. Remote On-Call Support
4. Technology Consulting
